

## IOM MENTAL HEALTH AND PSYCHOSOCIAL SUPPORT PUBLICATIONS

The Manual on Community-Based Mental Health and Psychosocial Support (MHPSS) in Emergencies and Displacement describes the process IOM MHPSS programme managers should follow to design and implement relevant programmes in the aftermath of an emergency and with displaced populations.

The manual is available in English, Spanish, French, Romanian, Russian, Slovak and Ukrainian.

The toolkit on Mental Health and Psychosocial Support at points of entry (PoE) aims to help IOM Missions and personnel at PoE to gain a basic overview of MHPSS needs of populations on the move and viable skills aimed at responding to these needs, within the limitations of timing and context of PoE and of professional roles of personnel at PoE.

This toolkit systematizes a series of tools that can support IOM Missions and partners in developing actions, training and capacity in this domain.

The manual on MHPSS and livelihood integration (MLI) was developed to complement MHPSS programming that is integrated into livelihood projects. The MLI manual introduces guidance on developing MHPSS activities adapted for livelihood programme participants.

It includes specific modules on a selection of essential psychosocial skills and coping mechanisms that can support persons engaged in livelihoods, promoting their ability to take full advantage of their work in the short and long-term.

This manual is available in English, Arabic and Kurdish (Badini).

Conecta aims to improve the access of MHPSS services. It explains the main causes of the difficulties migrants face to access MHPSS services in Latin America and the Caribbean.

This document includes suggestions on how to design strategies to meet the mental health needs of migrants overcoming the access barriers.
